Customizing the D2L Homepage in your F2F Course

Your D2L page is the first point of contact with your students prior to the first day of class and serves as a platform throughout the semester to provide information and maintain contact. In this interactive session, you will learn how to customize your homepage using a variety of D2L tools to reduce clutter, organize content, communicate effectively, and build rapport. You will have the opportunity to consider different options and make decisions about your own courses so that you leave ready to implement changes for the summer and fall semesters!
