Questions for Initial Partner Meeting

| Category | Questions | | | | |
|--------------------------|---|--|--|--|--|
| Partner Experience | What experience does the partner have working with college students, | | | | |
| with College Students | and specifically from your institution? | | | | |
| Motivation and Appeal | Why is the organization interested in participating in a service- | | | | |
| | learning project, and is there anything that is specifically appealing or | | | | |
| | motivating for them? | | | | |
| Challenges in Service | What are the major challenges that the partner faces in providing | | | | |
| Provision | community-based services? | | | | |
| Perception of College | How does the organization view college students? Are they | | | | |
| Students | considered to be a valuable resource? | | | | |
| Application of | How readily could students apply what they are learning in the | | | | |
| Classroom Learning | ing classroom to their service projects/opportunities? | | | | |
| Supervision and | What capacity does the organization have to host and supervise | | | | |
| Capacity | students? How many and under what timeframes? | | | | |

To-Do List for Initial Partner Meeting

| Step | Description | | |
|--|---|--|--|
| Explore Community and University Assets and Needs | Identify and understand the assets and needs of both the community and the university to find common ground and areas for collaboration. | | |
| Brainstorm Projects | Generate ideas for projects that address the mutual needs and desired outcomes of both the community and the university. | | |
| Consider a Short-term Project as a Pilot | Initiate a smaller scale project as a pilot to build trust and test the feasibility of the partnership approach. | | |
| Establish Communication Frequency and Methods | Determine how often and through which methods partners will communicate to ensure smooth collaboration. | | |
| Begin Preliminary Outline for Evaluation | Start discussions on how the partnership and its outcomes will be evaluated, including key metrics and processes. | | |
| Outline a Partnership Agreement | Draft an agreement detailing the goals, boundaries, expectations, planned feedback mechanisms, and other relevant details of the partnership. | | |

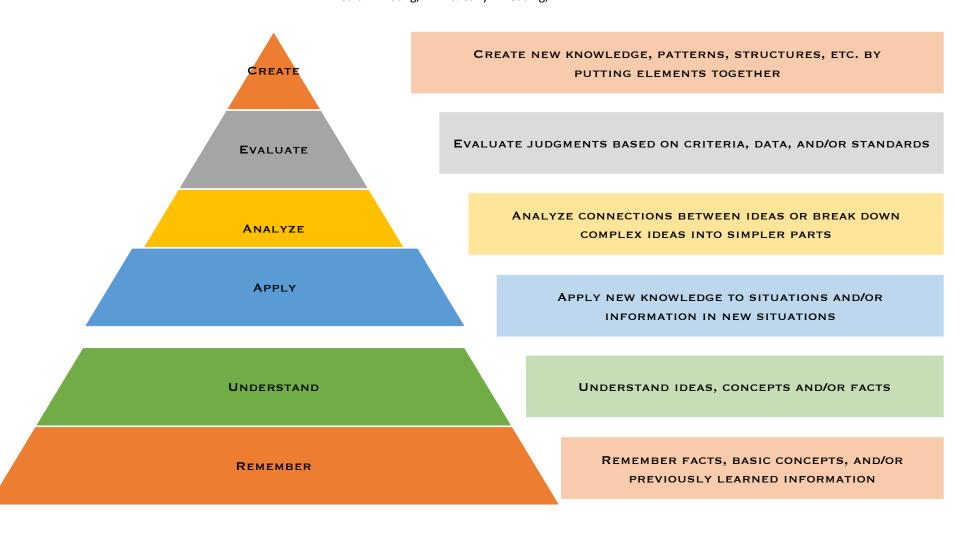

Service Learning Course Rubric Example

| | Exemplary/Strong | Proficient/Moderate | Insufficient/Weak |
|---|--|--|---|
| Scoring Guide | Criteria fully met, demonstrates thoughtful consideration and application of best practices. | Criteria met, demonstrates an understanding and application of best practices. | Criteria not met, demonstrates a lack of understanding or consideration of best practices. |
| Course Design and Objectives | Clear alignment between course objectives, service activities, and learning outcomes. Objectives are measurable, | Alignment between course objectives, service activities, and learning outcomes is evident. Objectives are generally measurable, achievable, | Lack of clear alignment between course objectives, service activities, and learning outcomes. Objectives are unclear, impractical, |
| | achievable, relevant, and time-bound. | relevant, and time- bound. | or not time-bound. |
| Community Partnership and Engagement | Service activities are designed in collaboration with community partners. | Service activities show collaboration with community partners. | Service activities lack collaboration with community partners. |
| | All partners have an equal voice in shaping service activities and learning objectives. | Partners have some voice in shaping service activities and learning objectives. | Limited or no input from partners in shaping activities and objectives. |
| Ethical Considerations and Cultural Competency | The course encourages sensitivity to community needs, values, and cultural norms. | Some sensitivity to community needs, values, and cultural norms is evident. | Little sensitivity to community needs, values, and cultural norms. |
| | Clear guidelines on respectful and ethical behavior during service activities. | Guidelines on respectful behavior are present but may be lacking clarity. | Lack of clear guidelines on respectful and ethical behavior. |
| Student Learning and Development | Academic learning seamlessly integrated with practical service experiences. | Academic learning is integrated with service experiences, contributing to understanding. | Limited integration of academic learning with service experiences. |
| | Service activities designed to enhance students' understanding of course content. | Service activities somewhat enhance students' understanding of course content. | Service activities do not significantly contribute to understanding course content. |

| Power Dynamics and Reciprocity | The course design recognizes and addresses power imbalances. | Recognition of power imbalances and attempts to address them. | Limited recognition of power imbalances. |
|--------------------------------------|--|---|---|
| | Promotes shared decision-making and equal participation in service activities. | Some promotion of shared decision-making and equal participation. | Minimal promotion of shared decision-making and equal participation. |
| Reflection and Assessment | Opportunities for regular, structured reflection activities. | Some opportunities for reflection activities. | Lack of opportunities for reflection activities. |
| | Reflection activities encourage students to relate service experiences to academic learning. | Reflection activities somewhat encourage students to relate service experiences to academic learning. | Reflection activities do not encourage students to relate service experiences to academic learning. |

Bloom's Taxonomy Applied to a Service-Learning Course

Sarah L. Young, PhD. & Carly L. Redding, Ph.D.

Effective Management of Engaged Projects

Sarah L. Young, Ph.D. & Carly L. Redding, Ph.D.

Stage 1: Four Key Differences in Faculty Responsibilities in Engaged Learning

- Provide both students and community partners with a clear framework of their roles and responsibilities.
- Be prepared to be much more hands-on in providing essential guidance to students throughout the process, supporting the identification of meaningful service opportunities, setting learning objectives, and navigating challenges that arise
- Integrate structured reflection into the learning process, which is a hallmark tool in the service learning process
- Be prepared to change what and how you assess students' performance.

Stage 2: Identify Partner(s) and Project(s)

- Step 1: Find a partner
- Step 2: Meet the potential partner (Ditch Zoom when possible in the beginning!) see handouts for example, questions to ask and tasks to complete during the meeting!
- Step 3: Co-develop projects and identify the best model type
- Step 4: Discuss the partner's preferred frequency and modes of communication.

Stage 3: Build the (Rough Draft) of the Course

- Conduct a thorough community assessment with the community partner.
- Outline course objectives that reflect the specific knowledge, skills, and competencies that students are expected to gain through the service learning project see Bloom's taxonomy handout!
- Select the appropriate service projects (this is critical!).
- Write the syllabus For examples, see: https://compact.org/resources
- Develop a course evaluation rubric see the handout for an example!
- Establish community partner assessment and communication plans
- Identify a timeline and flexible framework

Stage 4: Pre-Implementation Work

- Cultivate equitable, culturally sensitive partnerships
- Foster cultural competence in students
- Prepare to navigate bureaucratic hurdles

Stage 5: Implement the Project

- Introduce students to the intricacies of the project and foster enthusiasm and commitment on the very first day!
- Invite the community partner to be a part of the course's process
- Keep an eye on red-flag scenarios:
 - Overstepping boundaries
 - Stereotypes and implicit/explicit bias
 - o The white savior complex
 - o Adapt and acknowledge when change is needed
